FOREIGN INVESTMENTS

As globalization progresses, more and more SMEs are deciding to expand their foreign activities. This often involves them in concluding long-term cooperation agreements with suppliers and distributors, participating in international joint ventures or building up foreign branches or subsidiaries of their own. We offer a program of activities specially tailored to the needs of SMEs; these include in particular:

- Scrutinizing and devising the necessary concepts for contracts and corporate structures
- Market surveys and the search for suitable partners
- Arranging contacts with banks, management and tax consultants, auditors and regulatory authorities
- Comprehensive transaction management

Our clients are assisted by teams of lawyers specially put together to deal with the project on hand - teams that are well practiced in working together and are trained in the law of a variety of jurisdictions. For our clients, this means „one stop shopping“, since legal assistance on the foreign market is coordinated from a central point of contact.

- Scrutinizing and devising the necessary concepts for contracts and corporate structures
- Market surveys and the search for suitable partners
- Arranging contacts with banks, management and tax consultants, auditors and regulatory authorities
- Comprehensive transaction management
